Full Sighting Description:

Summary Description:

Characteristics of Object : (Check all that apply)

- There were lights on the object
- The object left a trail
- There was an aura or haze around the object
- The object emitted other objects
- The object emitted beams
- The object changed color
- The object landed
- The object made a sound
- There were aircraft in the vicinity, or aircraft chasing the object
- There were electrical or magnetic effects, such as a car engine stopping

Close Encounter (Check all that apply) :

- This is a possible UFO abduction case

Part 2 - Witness Contact Information:

Check all that apply :

- I would like to be contacted by an investigator
- I have also reported this sighting via our telephone hotline
- I would consent to a return collect call
- I give permission to release my name
- I am sending accompanying image or other data via the postal mail
- I am emailing image files

Submitting Graphics :

A photograph or video of the object is the most useful form of evidence in any sighting. Absent a photograph, an illustration of the object observed, even a simple outline drawing of its shape is very helpful. Also, a photocopy of an official map, indicating where the observers were located and what direction(s) they were looking is extremely helpful, and will permit a calculation of latitude and longitude. If you can provide such materials, please mail them to us at :

=====

What are the kinds of Close Encounters that are recognized by UFologists?

From Wikipedia: -> In ufology, a close encounter is an event in which a person witnesses an unidentified flying object. This terminology and the system of classification behind it was started by astronomer and UFO researcher J. Allen Hynek known as "Hynek's Scale": Hynek devised a sixfold classification for UFO sightings: arranged according to increasing proximity: Nocturnal Lights (Lights in the night sky.) - Daylight Discs (UFOs seen in the daytime, generally having discoidal or oval shapes.) Radar-Visual (UFO reports that have radar confirmation. These seem to offer harder evidence that the objects are real, although radar propagation can often be unreliable .[9]

-1- Close Encounters of the First kind: - Visual sightings of an unidentified flying object seemingly less than 500 feet away that show an appreciable angular extension and considerable detail.

-2- Close Encounters of the Second kind: - A UFO event in which a physical effect is alleged. This can be interference in the functioning of a vehicle or electronic device; animals reacting; a physiological effect such as paralysis or heat and discomfort in the witness; or some physical trace like impressions in the ground, scorched or otherwise affected vegetation, or a chemical trace.

-3- Close Encounters of the Third kind: - UFO encounters in which an animated creature is present. These include humanoids, robots, and humans who seem to be occupants or pilots of a UFO.

The UFO researcher Ted Bloecher proposed six subtypes for the close encounters of the third kind in Hynek's scale: 6 Types of Close Encounters of the Third Kind:

A : An entity is observed only inside the UFO.

B : An entity is observed inside and outside the UFO.

C : An entity is observed near to a UFO, but not going in or out.

D : An entity is observed. No UFOs are seen by the observer, but UFO activity has been reported in the area at about the same time.

E : An entity is observed, but no UFOs are seen and no UFO activity has been reported in the area at that time.

F : No entity or UFOs are observed, but the subject experiences some kind of "intelligent communication".

* Subtypes D, E, and F may be unrelated to the UFO phenomenon. *

Note: These are Extensions of Hynek's scale:

-4- Close Encounters of the Fourth kind:

A UFO event in which a human is abducted by a UFO or its occupants. This type was not included in Hynek's original close encounters scale.

Hynek's erstwhile associate Jacques Vallee argued in the Journal of Scientific Exploration that a CE4 should be described as "cases when witnesses experienced a transformation of their sense of reality", so as to also include non-abduction cases where absurd, hallucinatory or dreamlike events are associated with UFO encounters. The film The Fourth Kind makes reference to this ranking.

-5- Close Encounters of the Fifth kind:

A UFO event that involves direct communication between aliens and humans. This type of close encounter was named by Steven M. Greer's CSETI group and is described as bilateral contact experiences through conscious, voluntary and proactive human-initiated cooperative communication with extraterrestrial intelligence.

-6- Close Encounters of the Sixth kind:

Death of a human or animal associated with a UFO sighting, although some might consider this as a more severe example of a second-kind encounter.

-7- Close Encounters of the Seventh kind:

The creation of a human/alien hybrid, either by sexual reproduction or by artificial scientific methods.[18]
